

Pre-congress Workshop Cadaveric Endometriosis Masterclass

Objective

- Enhance surgical skills and knowledge in the surgical management of endometriosis.
- Offer hands-on experience with cadaveric dissection under the guidance of experts.
- Provide updates on the latest techniques and approaches in surgical management of endometriosis.

Description

The BSGE ASM25 Pre-congress Cadaveric Endometriosis Masterclass is an intensive training session designed to provide advanced practical and theoretical knowledge in the surgical management of endometriosis.

This masterclass will include cadaveric dissections, live demonstrations, and expert-led workshops focused on improving surgical outcomes and patient care.

Who should attend?

This course is ideal for senior trainees in gynaecology and consultants who are looking to deepen their understanding and enhance their skills in endometriosis surgery.

Participants will benefit from direct exposure to cutting-edge surgical techniques and the opportunity to discuss, and operate complex cases with leading specialists in the field.
