

## Pre-congress Workshop Advanced Urogynaecology

### Objective

This workshop aims to provide:

- an overview of interventional procedures performed in urogynaecology, including a step-by-step detailed approach of laparoscopic techniques for pelvic organ prolapse and stress urinary incontinence.

Hands-on training for:

- bladder botox injections
- periurethral bulking agents (Bulkamid)
- laparoscopic mesh sacrocolpopexy

### Description

This is a one-day surgical simulation workshop, which represents a unique opportunity to participate in hands-on surgical techniques for pelvic organ prolapse and urinary incontinence.

A faculty of recognised experts in the field will be providing lectures as well as hands-on supervision.

### Who should attend?

Trainees and consultants with an interest in laparoscopy and urogynaecology
